The image displays a collage of screenshots from various tools used in ITSM. On the left, a Jira Service Management interface shows 'Change details' for an infrastructure change, listing impacted services like 'WEB STORE', 'WEB PORTAL', and 'ORACLE DB'. Below this, the 'Automation' section shows a rule for 'Standard change - auto-approve' with details on its triggers and actions. In the center, a Bitbucket interface shows a pipeline for 'open-webstore' with a 'Change request pending' warning. On the right, a Jira dashboard shows 'Deployments' with a Gantt chart and insights.

2.2 Atlassian 도입 사례

금융권 M사

⚡ Jira Service Management
✖ Confluence ▣ Bitbucket ⚙ Bamboo ⚡ Jira

● 도입 배경

- 금융 사 IT 부서
- 여러 채널(이메일, 전화, 메신저, 게시판)로 들어오는 문의
- 내부회계감사 대응 필요
- 결제 프로세스 필요
- 개발 팀과 운영 팀 진행 상황 공유 필요

● 도입 결과

- 채널을 통합하는 포탈 화면 제공
- Knowledge Base(산출물, 메뉴얼, 참조문서) 관리 및 검색
- 형상관리와 연동
- 정기 또는 비정기 빌드 배포
- 유연한 결제 프로세스 구현
- 변경, 승인 등 감사 기록

IT회사 N사

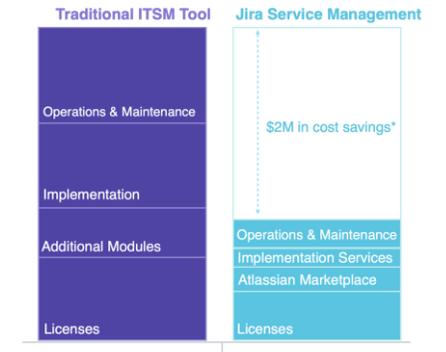

⚡ Jira Service Management
✖ Confluence ⚡ Jira

● 도입 배경

- Cloud 서비스 컨설팅, 구축 및 유지보수 지원
- 다양한 고객의 SR 통합 및 관리 필요
- 이슈 발생 시 다수 고객으로 유사한 요청이 몰림 (시급성 높음)
- 승인 프로세스 자동화 어려움
- 작업 계획서 연동 어려움
- 운영 자산 관리가 필요
- 비용 절감 필요 (기존 Zendesk 사용)

● 도입 결과

- 프로젝트별 그룹별 티켓 관리
- 승인 프로세스 구현 및 자동화
- 솔루션 별 연동 통합 (자산관리)
- 고객 만족도 조사 자동 발송 / 대시보드 제공

Project plan: Online support platform

To support the company-wide efforts to better meet customer needs and achieve our sales goals, we've identified building a new online support/communication platform as a key first step. This effort is essential for enhancing our ability to interact with and support our customers effectively.

Requirements

- Support partner and customer collaboration
- Optimize self-serve resources
- Increase visibility of giving opportunities
- Build a foundation for community growth
- Reduce feedback cycle times

AI work breakdown in Jira

Implement real-time vehicle tracking on main fleet dashboard

As a fleet manager, I want to receive real-time alerts on the dashboard when a vehicle in my fleet is involved in an incident, such as a collision or breakdown, so that I can quickly respond and minimize downtime.

The real-time alerts should be prominently displayed on the fleet management dashboard, using a visually distinct notification style (e.g., a pop-up message or a dedicated alerts section). The alerts should remain visible until acknowledged by the fleet manager, at which point they should be logged in an incident history for future reference.

Atlassian Intelligence에서는 고객 데이터를 어떻게 사용합니까?

숨기기

Atlassian Intelligence는 사용자의 입력을 처리하여 사용자가 요청한 출력을 제공합니다. 또한 Atlassian은 **사용자가 볼 수 있는 권한**이 있는 제품 인스턴스 내에서 조직 데이터를 처리하고 해당 데이터를 사용자 입력에 포함합니다. 따라서 LLM이 더 정확하고 관련성 있는 상황별 응답을 제공할 수 있습니다.

파트너사인 OpenAI에서는 사용자의 입력 및 출력을 유지하지 않으며 **서비스 개선을 위해 사용자의 입력 및 출력을 사용하지 않습니다.**

하지만 Atlassian은 페이지 요약을 표시할 때 또는 검색 기록 표시와 같은 기능을 제공해야 할 때 지연 시간을 줄이기 위해 제한된 기간 동안 입력 및 산출물을 저장할 수 있습니다. 어떤 기능이 데이터를 저장하는지 자세히 알아보려면 [투명성 페이지](#)를 방문하세요.

- Agents – Draw.io

The screenshot shows the Atlassian Rovo interface within a Confluence page titled "Onboarding Process overview". The interface includes a navigation bar with "Confluence", "Home", "Recent", "Spaces", "Teams", "Apps", and "Templates", along with a "+ Create" button. A search bar contains "Search or ask Rovo". The main content area displays a list of tasks for an onboarding process:

- 1. HR manager
 - a. Complete intake documents
 - b. Send NDA to new teammate
 - c. Enter payroll details
- 2. IT Engineer
 - a. Create login credentials
 - b. Configure laptop

Below the list, a "Draw.io" agent has generated a sequence diagram. The diagram shows three lifelines: HRManager, ITEngineer, and NewTeammate. The HRManager lifeline has a self-call labeled "Complete intake documents". A message arrow labeled "Send NDA to new teammate" points from HRManager to NewTeammate. The diagram is displayed in a window titled "Tell Draw.io what to do next" with the instruction "Suggest a sequence diagram that showcases the process". At the bottom of the window are buttons for "Chat", "Cancel", "Insert below", and "Replace".
